This document provides information on how to monitor the performance of LDAP on the AD server.

### Configuration Steps

Use `\Administrator Tools\Performance Monitor` to monitor the LDAP performance on the AD server.

- Add `LDAP*` under `NTDS` section to the counter list

### Reference

For detailed information of each counter, see: [http://msdn.microsoft.com/en-us/library/ms803980.aspx](http://msdn.microsoft.com/en-us/library/ms803980.aspx)
