

SecureAuth Apps

Summary

SecureAuth Apps include client (desktop), mobile, and browser applications that work with SecureAuth IdP but are not necessarily version-specific.

Application Guides

SecureAuth RADIUS Server v20.03 documentation

- [SecureAuth® Identity Platform configuration](#)

- [Installation guide - v2.5 - SecureAuth IdP RADIUS server](#)
- [Configuration guide - v2.5 - SecureAuth IdP RADIUS server](#)
- [End-user experience - v2.5 - SecureAuth IdP RADIUS server](#)

SecureAuth IdP RADIUS server v19.06 integration guide

- [Installation guide v19.06, SecureAuth IdP RADIUS server](#)
- [Configuration guide v19.06, SecureAuth IdP RADIUS server](#)
- [End-user experience v19.06, SecureAuth IdP RADIUS server](#)

SecureAuth IdP RADIUS server v2.4 integration guide

- [Installation guide - v2.4 - SecureAuth IdP RADIUS server](#)
- [Configuration guide - v2.4 - SecureAuth IdP RADIUS server](#)
- [End-user experience - v2.4 - SecureAuth IdP RADIUS server](#)

SecureAuth RADIUS server v19.09 documentation

- Troubleshooting SecureAuth RADIUS Server, v19.09
 - View Adaptive Authentication login failure scenarios, v19.09
 - View sample logs for RADIUS failover scenarios, v19.09
 - Enable RADIUS server logs, v19.09
- End-user enrollment, v19.09
 - Multiple devices registered for second-factor authentication, v19.09
 - Multi-screen login workflows, v19.09
 - Single screen login workflows, v19.09
- Configuration, v19.09
 - Step C: RADIUS Clients configuration, v19.09
 - Client user interface configuration options, v19.09
 - Export or import the RADIUS configuration, v19.09
 - Step B: IdP Realms configuration, v19.09
 - Step A: Settings configuration, v19.09
 - SecureAuth IdP RADIUS Server admin console, v19.09
- Upgrade, v19.09
- Installation, v19.09
- SecureAuth Identity Platform configuration, v19.09
- Prerequisites for RADIUS server, v19.09

SecureAuth IdP RADIUS Server v2.3.9+ Integration Guide

- SecureAuth IdP RADIUS Server v2.2.19 Integration Guide
 - SecureAuth IdP RADIUS Server v2.2.19 Installation Guide
- SecureAuth IdP RADIUS Server v2.3.8 Integration Guide
 - SecureAuth IdP RADIUS Server v2.3.8 Installation Guide
- SecureAuth IdP RADIUS Server v2.1.0 Integration Guide
 - SecureAuth IdP RADIUS Server v2.1.0 Installation Guide
- SecureAuth IdP RADIUS Server v2.0.2 Integration Guide
 - SecureAuth IdP RADIUS Server v2.0.1 Integration Guide
 - SecureAuth IdP RADIUS Server v2.0.1 Installation Guide
 - SecureAuth IdP RADIUS Server v2.0.2 Installation Guide
- SecureAuth IdP RADIUS Server Static IP Address Configuration Guide
- SecureAuth IdP RADIUS Server v2.3.9+ Installation Guide
- SecureAuth RADIUS v1.0.1.X Installation Guide

SecureAuth Authenticate App v20.03 documentation for iOS and Android

- PIN creation and management, v20.03
 - Log into an account with a PIN, v20.03
 - Change a PIN, v20.03
 - Create a new PIN, v20.03
 - Create a PIN, v20.03
- Troubleshooting SecureAuth Authenticate app
 - Fix "Account disconnected" issue
- Connect an account to your user profile, v20.03
 - Connect with a URL, v20.03
 - Connect with a QR code, v20.03
- Optional Helpdesk contact set up, v20.03
- Optional pre-populate the enrollment URL, v20.03
- Login requests from Push Notifications, v20.03
 - Accept TOTP in VPN client from mobile app or watch, v20.03
 - Accept symbol in mobile app to log into VPN client, v20.03
 - Accept touch/fingerprint or face request received on the app, v20.03
 - Accept symbol on a paired watch, v20.03
 - Accept request on a paired watch, v20.03
 - Accept request from a notification on the app, v20.03
 - Accept request received on the app, v20.03
- Prerequisites, v20.03
- App account management, v20.03
 - Rename an account, v20.03
 - Reconnect an account, v20.03
 - Delete an account, v20.03
 - Copy a passcode, v20.03
- Optional PIN custom security set up, v20.03

SecureAuth Authenticate App v19.09 documentation for iOS and Android

- Prerequisites
- PIN creation and management
 - Log into an account with a PIN
 - Change a PIN
 - Create a new PIN
 - Create a PIN
- App account management
 - Reconnect an account
 - Rename an account
 - Delete an account
 - Copy a passcode
- Login Requests from Push Notifications
 - Accept TOTP in VPN client from mobile app or watch
 - Accept symbol in mobile app to log into VPN client
 - Accept touch/fingerprint or face request received on the app
 - Accept symbol on a paired watch
 - Accept request on a paired watch
 - Accept request from a notification on the app
 - Accept request received on the app
- Connect an account to your user profile
 - Connect with a URL
 - Connect with a QR code
- Optional PIN custom security set up

SecureAuth Passcode App v19.10.02 for Windows

- SecureAuth Passcode App v19.10 for Windows
- SecureAuth Passcode for Windows v2.0.1
- SecureAuth Passcode for Windows v2.0
- SecureAuth OTP Windows Desktop Client

SecureAuth Authenticate App v19.12 documentation for iOS and Android

- Prerequisites, v19.12
- PIN creation and management, v19.12
 - Log into an account with a PIN, v19.12
 - Change a PIN, v19.12
 - Create a new PIN, v19.12
 - Create a PIN, v19.12
- Connect an account to your user profile, v19.12
 - Connect with a URL, v19.12
 - Connect with a QR code, v19.12
- Optional Microsoft Intune integration, v19.12
- Optional PIN custom security set up, v19.12
- App account management, v19.12
 - Reconnect an account, v19.12
 - Copy a passcode, v19.12
 - Rename an account, v19.12
 - Delete an account, v19.12
- Login Requests from Push Notifications, v19.12
 - Accept TOTP in VPN client from mobile app or watch, v19.12
 - Accept symbol in mobile app to log into VPN client, v19.12
 - Accept touch/fingerprint or face request received on the app, v19.12
 - Accept symbol on a paired watch, v19.12
 - Accept request on a paired watch, v19.12
 - Accept request from a notification on the app, v19.12
 - Accept request received on the app, v19.12

SecureAuth Credential Provider Configuration Guide v2.8.5

- SecureAuth Credential Provider Configuration Guide v2.8.2
- SecureAuth Credential Provider Configuration Guide v2.6.5
- Microsoft Windows 2-Factor Logon (Credential Provider) v2.0.1
- SecureAuth Credential Provider Configuration Guide v2.1.11
- SecureAuth Credential Provider Configuration Guide v2.5

SecureAuth Authenticate App for iOS and Android v5.3

SecureAuth Authenticate app for iOS and Android v5.2

SecureAuth Authenticate App for Android and iOS v5.x

SecureAuth Authenticate App v19.06 for iOS and Android
