

Getting Started Guide for 9.1 - 9.2

SecureAuth IdP Appliance

Congratulations on choosing SecureAuth IdP, the leader in adaptive access control solutions!

At this point you should have received a Shipment Notification email from SecureAuth with instructions on downloading your virtual appliance or to notify you that your hardware appliance is on its way. In addition, you will receive a physical letter mailed to the contact on record which contains your appliance and Windows Server activation codes.

What should I do next?

- First, schedule a Pre-deployment Meeting with your Sales Engineer. The Sales Engineer will be your main source of assistance in deploying the appliance.
- Read Part I (below) of this Getting Started guide before your Pre-deployment Meeting and be ready to discuss the topics mentioned there with your Sales Engineer.
- [Getting Started I - Pre-Install](#)
- [Getting Started II - Install and Setup](#)
- [Getting Started III - Welcome to the SecureAuth IdP Web Admin](#)

We look forward to working with you!
