

# Pair your device with a QR code

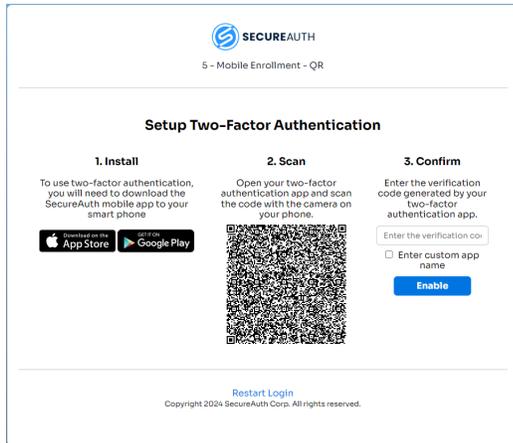

Set up SecureAuth Authenticate in minutes

SecureAuth Authenticate

Download **SecureAuth Authenticate** from the Apple App Store or Google Play. Then follow these steps to pair your device. You will need the QR code enrollment page from your organization.

1

## QR enrollment page

Follow your organization's instructions to open the QR code enrollment page in your browser.

2

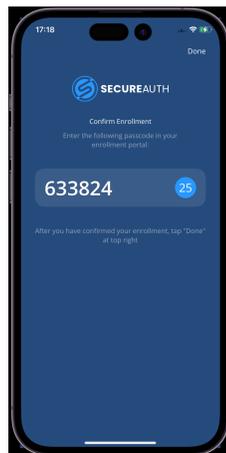

## Scan the QR code

Open Authenticate and point your camera at the QR code.  
First time: the app opens to the scanner.  
Already paired: tap the QR icon on the Dashboard.

3

## Enter the verification code

The app displays a 6-digit code with a timer. Enter this code on the enrollment page to confirm.

4

## You're paired

Your account appears on the Dashboard. Offline code is under Web Codes. You're ready to go.
